

# SOLVAir® BREEZE

Spotlight on air pollution control

March 2019

## FOCUSING ON... What DSI can do for you!

When it's time to invest in an [acid gas treatment system](#), cost and effectiveness are usually the two top priority criteria. But... how about simple and reliable process equipment and a small footprint? Ease of retrofit? Process flexibility? Multi-pollutant capture? Some or all of these benefits are why so many plants look to [Dry Sorbent Injection](#) with sodium sorbents to clean acid gas emissions. Find out a whole lot more...[click here!](#)

## WHAT'S UP! Regulatory compliance...still on the table!

Yes! And it's why, when cost is an issue, [DSI](#) is a relatively low CAPEX solution that can provide exceptional results in the treatment of acid gases, helping plants achieve regulatory compliance efficiently and effectively. How effectively? [SO<sub>2</sub> and HCl](#) removal rates up to 98-99%, depending on level of pollutant and plant configuration! No, not blowing smoke! [Check it out here!](#)

Contact me for more information about our sodium sorbents, services and DSI!
