

SOLVAir® QuickFacts

Combating air pollution... SOLVAir Solutions is global!

Q. Air pollution's not a localized problem – does SOLVAir Solutions have a presence outside of North America?

A. Yes, SOLVAir Solutions is supported by the global SOLVAir initiative. We're a part of the Global Business Unit (GBU) Soda Ash, which provides chemicals to the worldwide marketplace.

Q. Does the global SOLVAir group offer the same products and service as in North America?

A. Many of the chemicals available in NAFTA are manufactured or offered throughout the world. DSI technology is universally applicable and SOLVAir products are marketed in the Northern and Southern Hemispheres as well as the Western and Eastern parts of this world – a real global reach.

Q. One of the most important points would be ease of purchase and delivery. Where are your plants located?

A. Solvay's GBU plants and mines are located throughout Europe, in Thailand, and in the USA but product is shipped everywhere there is a need. Go to solvay.com to find your closest location.
