Join the SOLVAir Group at Booth #81 at July's APC/PCUG Conference!

The 2010 APC/PCUG Conference, to be held July 18-23, 2010 in Concord, North Carolina, offers the chance for coal-fired power plant operators and air pollution control experts from industry to discuss issues and to share information on possible air pollution solutions.

The SOLVAir Products Group will be exhibiting at the APC, ready to discuss the pros and cons of sodium sorbents used in the control of air pollution. Long a mainstay in the fight against acid gas emissions, SOLVAir Products are used to effectively reduce SO₂, SO₃, HCl and to improve mercury capture. So if you're interested in sodium sorbents and how they are used to treat acid gas emissions, you've come to the right place!

Join us at Booth #81 at the APC/PCUG Conference. We look forward to seeing you there and discussing options you may not have considered!
